ACUITY BUSINESS SOLUTIONS RATED IN TOP 1% OF UK'S FASTEST GROWING COMPANIES

Exeter company Acuity Business Solutions has been rated in the top 1% of UK companies, according to the prestigious publication Who's Who of Britain's Business Elite.

The recognition was based on an analysis of growth in shareholders' funds as recorded at Companies House, which is regarded as the best measure of a company's growth, and on that basis Acuity was placed in the top 1%, having grown by more than ten times over the past year.

Directors Andrew Brown and Phil Trickey were delighted to have joined the country's top businesses in such a well-known publication. "It's great to receive such an accolade," commented Andrew. "We only started up three years ago, and despite the tough conditions we have succeeded in developing a high quality and rapidly expanding customer base."

Acuity has its offices at the Exeter Basepoint business centre – part of the Basepoint Group owned by charity The ACT Foundation - and provides performance-enhancing information technology consultancy and solutions to companies and public sector organisations. Its client list includes Taunton and Somerset NHS Trust, Northern Devon Healthcare NHS Trust, the Welsh Assembly and top companies such as EDS and Capgemini. Acuity employs 3 staff at its office at Exeter Basepoint and has up to 9 consultants working off-site with clients at any one time.

Basepoint Exeter was completed at the start of 2009 and is a purpose-built facility providing a wide range of high quality office space and workshops for all kinds of small to medium-sized businesses. As part of grant-making charity The ACT Foundation its profits go directly towards enhancing the quality of life of people in need, particularly the mentally and physically disabled.
